

ChekInk II™ Tag

- Lightweight, durable dye tag**
- Unbeatable shrinkage control**
- Effective stand-alone deterrent or may be used with EAS hard tags**
- High-impact plastic construction for routine handling**
- Sealed vials of dye break if forcibly removed**

Discreet protection, effective deterrence.

ChekInk II™ Tag from Checkpoint Systems, Inc., is an affordable addition to any loss prevention program. Retailers can depend on ChekInk II to protect merchandise without interfering with a customer's shopping experience. And the tag's deterrent value means that merchandise can be openly displayed without cumbersome locks and chains.

This distinctive tag addresses the customer's need for comfort and the retailer's need for protection – an effective combination. Unobtrusive and aesthetically appealing, ChekInk II tags adhere to merchandise so inconspicuously that shoppers can try on merchandise with ease. Retailers can also use them in conjunction with other EAS hard tags.

Unbeatable shrinkage control.

With ChekInk II Tag, shoplifters are discouraged before they even attempt to steal. The tag contains sealed vials of dye that will break if forcibly removed from merchandise. The spilled dye permanently stains merchandise, rendering it unsuitable for return or re-sale. The result: significant reductions in shrinkage. The tags are constructed of durable high-impact plastic to withstand routine handling. A clear version of the tag is also available for increased deterrence.

Glass vials within ChekInk II break and spill dye when tampering occurs.

For added deterrence, ink vials are easily seen inside ChekInk II Clear tags.

ChekInk II™ Tag

ChekInk II Tag manufactured by Checkpoint Systems, Inc.

Simple to attach and detach.

Department stores, mass merchandisers, specialty stores, and sporting goods stores can all take advantage of ChekInk II's many benefits. Fabricated from strong yet lightweight materials, ChekInk II will not harm merchandise – even delicate fabrics. ChekInk II's fastener pin leaves no telltale marks to mar fine garments. Using any standard detacher, store personnel can swiftly and easily remove the tag during normal point-of-sale procedures.

Big defense, little package.

ChekInk II's small size lets retailers place it anywhere on merchandise. These lightweight tags feature small pins that maintain the look and quality of the merchandise. Durable ChekInk II tags have considerable deterrent value and are virtually impossible to defeat. Tampering with them will result in broken glass vials that spill dye, causing permanent damage to merchandise. For retailers who want extra protection for valuable merchandise, ChekInk II Tag provides a cost-effective solution.

Tag shown: Gray with generic copy.
